

## BOSE 203™ PROFESSIONAL LOUDSPEAKER

BUSINESSES HAVE UNIQUE NEEDS

BOSE® HAS UNIQUE SOLUTIONS

Research shows customers will visit and stay longer if they enjoy the atmosphere...especially the music. The award-winning technologies behind Bose home and automobile sound systems have been further developed to deliver quality sound in demanding business applications. These professional loudspeakers deliver the clear, lifelike sound your customers expect, even in noisy, high-traffic locations.

Bose 203 loudspeakers give you quality Bose sound without the need for special equipment and additional accessories. Often, they can be used with your existing amplifier to replace current loudspeakers or to expand your sound coverage.

Each Bose 203 loudspeaker uses two proprietary Bose 4 ½" (11.4 cm) StarDriver™ full-range drivers. They are engineered to provide consistent, high-quality sound; you hear deep bass, rich vocals and crisp highs. Bose 203 loudspeakers are also designed to be more reliable than conventional speakers whose small, separate tweeters are often unable to handle the high power and extended use required in many business applications. These loudspeakers are backed by a transferable five-year limited warranty.

Their compact size allows these loudspeakers to fit in a variety of locations. The Bose 203 loudspeaker is available in professional gray or arctic white and can be painted to match your interior.

Custom-designed hardware helps make installation fast and easy.
