

Discovery™ Z3

Stream your favorite music!

ELAC's Discovery Z3 is a high-performance wireless speaker that streams room-filling stereo sound from a compact package. 140 watts of powerful built-in amplification drives ELAC's custom-designed transducers to deliver crystal-clear highs and deep bass with so much impact you'll think there's a subwoofer hidden in the room! With just one system, you can stream all your favorite music effortlessly using your smartphone or tablet, to any room in your home.

A serious speaker design.

Unlike most compact systems that use a lightweight, injection-molded cabinet, off-the-shelf drivers and inexpensive digital amps, the Discovery Z3 is engineered from the ground up. A solid MDF cabinet eliminates resonances, while custom ELAC drivers make Z3 sound like a system many times its size—and cost.

Discovery Z3 Wireless Speaker

Big sound from a small package.

The ELAC Discovery Z3 Wireless Speaker delivers performance on a grand scale in one easy-to-set-up device that opens up a whole new dimension in listening. The Discovery custom app gets you up and running in just 30 seconds. Then, Discovery Z3 lets you stream your favorite music, switching from Discovery, Spotify Connect, Bluetooth, AirPlay and Roon, all with seamless convenience.

Discovery Z3 Wireless Speaker

DISCOVERY Z3 FEATURES

Custom-Designed Woofer with Aramid-Fiber Cone

Aramid fiber is employed in Z3's dual 4-inch woofers. Aramid fiber offers a superior strength-to-weight ratio and improved damping characteristics over conventional paper or plastic drivers. This added strength means arriving at designs that achieve a broader bandwidth with smoother response.

iOS and Android App

Doing away with a traditional remote control, a free smartphone/tablet application is available for download to simplify setup and allow for fine-tuning of Discovery Z3.

Discovery Ecosystem

The Discovery Z3 can be used as a stand-alone system or as a part of your whole-home Discovery Ecosystem, which makes it easier than ever to add music to other rooms in the house, all controlled with the Discovery Music Server application.

DS-Z31W-G SPECIFICATIONS
