

**EV** Innovative Design

**EVID C4.2 Ceiling**  
4" Two-way  
Coaxial Ceiling  
Loudspeaker System

## Key Features:

- 4" coaxial two-way
- Waveguide coupled Ti tweeter
- Full bandwidth overload protection
- Front baffle wattage tap adjustment
- Integrated low loss matching transformer allows for either 70v/100v or 8Ω operation
- Includes tile bridge and mounting ring for easy installation
- Integrated ported enclosure for extended bass response

## General Description:

The Electro-Voice EVID C4.2 loudspeaker system is a complete two-way ceiling loudspeaker package. The package consists of a bezel assembly, grille, rear enclosure, 4-inch coax two-way loudspeaker and internal line-matching transformer. The loudspeaker features a waveguide coupled titanium coated dome tweeter. The EVID C4.2 loudspeaker utilizes a 2nd order crossover network at 3.3kHz, with a comprehensive protection circuit to protect the network, woofer, and tweeter drivers from excessive power levels. The C.42 utilizes a transformer that offers a selection of 1.88 (70V only), 3.75, 7.5, 15 or 30 watts delivered to the loudspeaker system using either 70-V or 100-V lines, or 8Ω bypass.

Selection is via a convenient switch on the front baffle. The perforated grille is finished in semi-gloss white powder-coated enamel. The baffle and bezel are constructed from UL 94V-0 rated ABS. The rear enclosure is constructed from zinc-plated, heavy gauge steel. The rear enclosure, with fiberglass damping material, provides an optimum internal volume for extended low-frequency performance. A rear cover, with provision for a junction box fitting, provides access to a 4-pin terminal block that allows direct connection to the speaker with 12-gauge wire and provides pass-through to additional speakers. The EVID C2.4D model features a 3-pin fire-safety rated input block. A tile bridge is included for safe suspension of the C4.2 ceiling systems in a drop ceiling that uses mineral wool, or other fiber-based ceiling tiles. The EVID line of ceiling speakers has been designed to work together as a complete system in a wide range of different ceiling constructions. They provide wide dispersion, high-efficiency, high-maximum output, ease of installation, and wide-range reproduction of music or voice.

## Technical Specifications:

Freq. Range (-10dB):	65Hz–20kHz
Coverage (Conical):	130°
Power Handling:	50W Cont. / 200W Peak
Sensitivity (SPL 1W/1m):	86dB
Max Calculated SPL:	103dB Cont./109dB Peak
Impedance:	8Ω nominal (transformer bypass)
Network:	Network and transducers protected, 12dB/oct 3.3kHz
LF Transducer:	4 in. (100mm) Polypropylene cone
HF Transducer:	.75 in. (19mm) Ti Mylar laminate
Transformer Taps:	70V: 1.88, 3.75, 7.5, 15, or 30W 100V: 3.75, 7.5, 15, or 30W Bypass: 8Ω
Connectors:	<b>C4.2:</b> Phoenix type removable, with screw terminals and "loop-thru", accepts 12 ga wire <b>C4.2D:</b> Fire-safety rated input block, 3 terminal barrier strip accepts 12 ga wire
Enclosure Material:	Baffle - UL 94V-O rated ABS Backcan - Zinc plated steel
Grille:	Perforated powder-coated steel with safety tether
Support Hardware:	Tile bridge, backing plate support, cutout template, paint shield
Dim (H x Dia.):	6.9" x 7.1" (176mm x 181mm)
Cutout Size:	7.188" (183mm)
Net Weight (each):	6.0lbs (2.7kg)
Shipping Weight (pair):	14.0lbs (6.4kg)
Safety Agency Ratings:	UL 1480 Safe for use in air handling spaces per UL 2043

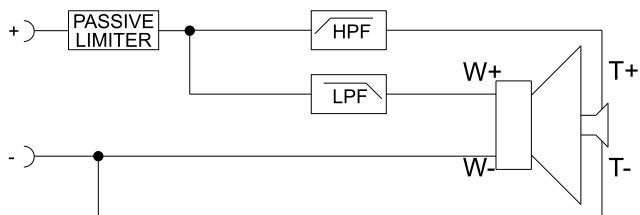

**Electro-Voice**

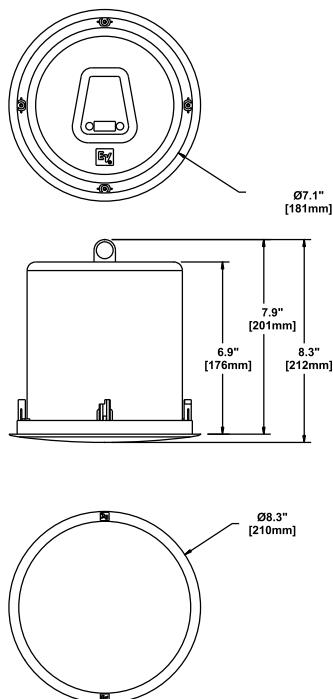

## Architects' and Engineers' Specifications:

The EVID C4.2 loudspeaker system shall be comprised of a UL 94V-0 fire rated ABS baffle/bezel assembly, zinc plated steel rear enclosure, powder coated grille with safety tether, transformer with  $8\Omega$  bypass and 4-inch polypropylene low frequency transducer with coaxially-mounted waveguide loaded  $\frac{3}{4}$ -inch titanium coated dome tweeter. The loudspeaker shall meet the following criteria: power rating shall be 50 watts of EIA RS-426A pink noise (6dB crest factor). Frequency response, uniform from 65Hz to 20Hz. Pressure sensitivity, 86dB SPL at 1meter (3.3 feet) on axis with one watt of pink noise (ref.  $20\mu\text{PA}$ ). Minimum impedance,  $6.0\Omega$ . The loudspeaker shall be 181mm (7.1in.) in diameter and 176mm (6.9in) deep. Weight shall be 2.7kg (6.0lb). The coaxial ceiling loudspeaker shall be the Electro-Voice model EVID C4.2.
