

KD-10SW

SUBWOOFER

MOVIE THEATER BASS

Klipsch subwoofers are engineered to bring the ultimate low frequency experience to your home, so your movies and music sound just like you're there.

ALL-DIGITAL AMPLIFIER

The built-in, all-digital amplifier delivers ample power with high efficiency and true-to-source accuracy in reproduction, ensuring maximum efficiency for maximum output, detail, and power.

FRONT-FIRING DRIVER

The high-performance 10" driver provides deep bass while minimizing distortion, while the front-firing design provides the utmost in room placement flexibility.

LOW PASS CROSSOVER AND PHASE CONTROL

Ensures the subwoofer's low-frequency tones blend with other Klipsch speakers and establish the ideal level of bass for your room.

LINE/LFE INPUTS

Ensures compatibility with any home theater receiver or processor.

LOW PROFILE GRILLE

Adds a refined look that is acoustically transparent.

DESIGNED AND ENGINEERED IN THE USA

Every new speaker that has the Klipsch logo bestowed upon it is designed and engineered with pride at our worldwide headquarters in Indianapolis. The team of engineers put their heart and soul into each and every Klipsch product, whether it be the smallest in-ear headphone or the biggest floorstanding speaker.

SPECIFICATIONS

FREQUENCY RESPONSE	32Hz-120Hz +/-3dB
MAXIMUM ACOUSTIC OUTPUT	112dB
AMPLIFIER	All digital
AMPLIFIER POWER	150W / 300W
DRIVE COMPONENTS	10" (25.4cm) high excursion, Polyfiber, front-firing woofer
ENCLOSURE MATERIAL	MDF
