DUBLIN TCX115B

15" Band Pass Subwoofer for Portable PA and Installation Applications

- Band pass subwoofer for portable PA and installation applications
- 1,000 Watts continuous, 4,000 Watts peak power
- Double suspension 15" low frequency driver with inside/outside wound coil
- Low distortion dual port design for maximum sound pressure level
- 15 mm (5/8") birch plywood enclosure with hard wearing semi matt black paint finish
- Integral M10 rigging points for ease of installation
- 35 mm pole mount to support satellite speaker
- Neutrik speakON® NL4 and barrier strip connectors
- 3-Year Warranty Program*
- Designed and engineered in England

The DUBLIN TCX115B is a 4,000 Watt 15" dual ported bandpass enclosure that is optimally tuned for extended low frequency response. Engineered to work in conjunction with **TURBOSOUND** loudspeaker management systems, the TCX115B provides very high output FOH performance and is ideally suited for a wide range of music and live sound reinforcement applications.

Custom-Engineered Drivers

TURBOSOUND is recognised the world over for designing and building some of the most iconic loudspeakers and subwoofers. We take meticulous care and pride in maintaining that reputation by utilising only drivers designed specifically for each application – it's what sets us apart from the competition.

The TCX115B features a powerful, double suspension 15" low frequency driver that utilises a special inside/outside wound voice coil for higher magnetic density, better heat dissipation, high power handling capacity, and improved efficiency. For its size and operating bandwidth, the TCX115B delivers extremely high and virtually distortion-free output for world-class low frequency performance that will stand the test of time.

Bandpass Enclosure Design

Bandpass enclosures are extremely efficient, creating maximum bass output within a specific frequency range by increasing the acoustic load presented to the driver. The low distortion bandpass design utilised in the TCX115B reinforces the bass musical instrument frequencies, and steep cut-off slopes ensure an effective acoustic transition for use with DUBLIN Series full-range loudspeakers. A typical application could consist of an TCX115B providing the low-frequency bass extension for one, or two DUBLIN Series top cabinets.

Construction and Connectivity

Constructed from 15 mm (5/8") birch plywood, the cabinet is finished in hard wearing semi matt black textured paint, and includes internal M10 threaded rigging points that allow it to be suspended in permanent installations using M10 eyebolts. A pole mount socket is provided to allow two way cabinets to be mounted at the correct height above the subwoofer. The rear connector panel provides two Neutrik speakON* NL4 connectors for input and link functions, wired in parallel with a 4-way barrier strip connector.

Rock-Solid Performance

Primarily designed for permanent installations such as houses of worship, banquet facilities, night clubs – and a host of other venues, the 4,000-Watt DUBLIN TCX115B puts touring-grade sound quality into a scalable loudspeaker system. In portable applications the subwoofer can be used with speaker poles – plus carrying handles are provided for ease of installation and transportation.

You Are Covered

We always strive to provide the best possible Customer Experience. Our products are made in our own [MUSIC Group](#) factory using state-of-the-art automation, enhanced production workflows and quality assurance labs with the most sophisticated test equipment available in the world. As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a generous [3-Year Warranty program](#).

Architecture & Engineering Specifications

The loudspeaker shall be of the passive subwoofer type consisting of one 15" (380 mm) LF driver. Performance specifications of a typical production unit shall meet or exceed the following: frequency response, measured with swept sine wave input, shall be flat within ± 3 dB from 35 Hz to 125 Hz and within -10 dB from 28 Hz to 170 Hz. Nominal dispersion, at -6 dB points, shall be Half Space. Nominal impedance shall be 8 Ohms. Power handling shall be 1000 Watts continuous, 4000 Watts peak. Sensitivity, measured on axis, mean averaged over stated bandwidth, shall be 95 dB, 1 Watt @ 1 metre. Maximum SPL (peak), measured at 1 metre with music program at stated amplifier input, shall be 131 dB. Dimensions: 600 mm high x 499 mm wide x 600 mm deep (23.6" x 19.6" x 23.6"). Net weight: 34.0 kg (75.0 lbs). The loudspeaker system shall be the **TURBOSOUND** TCX115B. No other loudspeaker shall be acceptable unless submitted data from an independent test laboratory verifies that the above combined performance / size specifications are equalled or exceeded.
